DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a carbon fiber precursor fiber bundle.

Group II, claim(s) 7-15 and 29-30, drawn to a method of making a carbon fiber precursor bundle.

Group III, claim(s) 16-25, drawn to an apparatus for making a carbon fiber precursor fiber bundle.

Group IV, claim(s) 26-28, drawn to a method for using a carbon fiber precursor bundle.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Arai et al teaches an apparatus for making Plural pitch fibers are divided into two or more bundles and interlacing by air flow is applied to the each bundle to provide a first fiber bundle, and plurality of the first fiber bundles are joined and interlacing by air flow is applied to the joined pitch fiber bundle to provide a second fiber bundle and the pitch fiber is taken off from the second fiber bundle which corresponds to an intermingling device that comprises a yarn channel having a flat rectangular section capable of passing a plurality of small tows which are adjacent to each other and that comprise a plurality of air jet holes. Because the special technical feature does not make a contribution over the prior art, restriction is proper.

3. A telephone call was made to Paul Killos on June 19, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
